May be upgraded to Newmarket and Curragh models

FEATURES

Horses do not need to stand still

Quiet weighing environment

Quick, accurate weight recorded to +/- 1%, guaranteed

100% water and sand proof

Use and store outside, including in extreme temperatures

No power source required

Fully charged indicator weighs 700 horses, on average

Robust aluminium construction

Usable on gentle gradients and uneven ground

Mobile – easily transported

Single person operation

Weight range 0.1kg – 1500kg (0.2lbs - 3300lbs) Overload 3000kg (6600lbs)

Recalibration never required

PC and Bluetooth compatible units available

MOBILITY

Curragh on the move

Tokyo on the move

ELECTRONICS

All platforms come complete with a handheld EziWeigh 5 Digital Electronic Read-Out Unit, which is mains re-chargeable. A wall mounting bracket is included.

Automatically zeros out any straw, shavings, manure etc on the platform between horse weighings.

The EziWeigh 5 read out unit stabilises out after a few seconds guaranteeing +/- 1% accuracy or 2 resolutions (whichever is greater). Supplied with a backlight feature.

The weight loadcells are not affected by changes in temperature and are qualified IP67 (guaranteed to be waterproof).

The minimum weighing resolution may be specified - ranging from 0.1kg (0.2lbs) to 5kg (11.02lbs). For afterbirths, jockeys, feed or dogs select the 0.1kg (0.2lbs) resolution, and for adult stock select the 0.5kg (1.1lbs) resolution.

The Internal re-chargeable battery is capable of 20 hours continuous weighing (approx. 700 horses). The read out unit turns itself off after 15 minutes of inactivity, preserving battery charge. There is an icon showing level of battery charge. Recharging may occur at any time.

Also available as upgrades to the EziWeigh 5 read-out unit are PC compatible units with memory facilities and horse identification - EziWeigh 7, ID5000, XR5000

EziWeigh 5

EziWeigh 7 - Bluetooth enabled

ID5000 and XR5000, both Bluetooth enabled

ERS Chip Scanner
